Environmental Policy Statement

Comtec Enterprises Ltd recognises its responsibility to protect the environment from pollution and to safeguard the health of staff and visitors to its sites

We are a leading UK based Information Technology services provider whose businesses provide a comprehensive range of IT based Infrastructure and related services in the UK and overseas.

It is a customer driven, service business and our potential impact on the environment stems from office-based operations and to a large extent, this dictates where Comtec can make progress in improving its environmental performance. The key areas where we can focus attention are purchasing, contracts, and shipping activities:

We will minimise the amount of waste we produce by raising staff awareness and encouraging the recycling of office waste, such as paper and plastics.

We will reduce the amount of energy we consume by continuing to use energy saving materials and procedures.

We will incorporate specific environmental requirements into contracts with principal suppliers and wherever practicable, specify products from sustainable sources, products made from recycled materials or designed to be easy to reuse or recycle.

We will comply with all relevant environmental, health and safety regulations and legislation at all times.

Comtec also promotes the use of unleaded petrol and actively encourages the use of alternative energy and public transport.
